Natural Vitamins

Dry, Liquid, Oil Soluble & Nutraceutical Extracts

*** Product Lists Available At Client Request**

- ❖ Ideal for food and medicinal applications due to its antimicrobial and antioxidant abilities.
- ❖ Excellent candidates to replace synthetic molecules, which are generally considered toxic and carcinogenic.
- ❖ Improve the shelf-life, nutritional and health-related properties of a variety of products.
- ❖ Enhances immune function, energy levels, and overall well-being.

Natural Colours

*** Product Lists Available At Client Request**

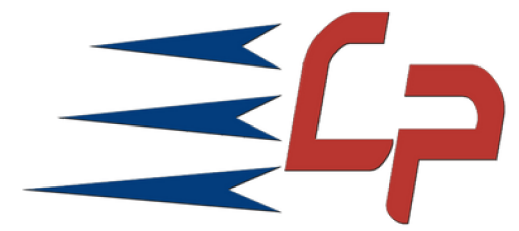

- ❖ **Has applications in the food, cosmetics, and healthcare industries. Not harmful to health and is easy to extract.**
- ❖ **There is minimal effluent generation. Durability and sustainability are very high.**
- ❖ **Serves as a renewable source and requires mild dyeing conditions. Has no allergic, carcinogenic or toxic reactions.**
- ❖ **Natural dyes also have high UV ray absorption capacity.**

Natural Vitamins

*** Product Lists Available At Client Request**

- ❖ **The body absorbs natural and synthetic supplements differently. Natural vitamins allow better absorption than synthetic ones.**
- ❖ **Needed for normal cell function, growth, and development. Biological active co-factors and co-nutrients are present.**
- ❖ **Purity is another advantage. No artificial chemicals are added. They are also easily metabolized and needed in less quantity.**
- ❖ **Natural vitamins help to keep your gut microbiome healthy thanks to higher bioavailability.**
